Good README generator

Description

Create a command-line application that dynamically generates a README.md from a user's input.

Table of Contents

```
* [Installation](#installation)
* [Usage](#usage)
* [License](#license)
* [Contributing](#contributing)
* [Tests](#tests)
* [Questions](#questions)
```

Installation

git clone https://github.com/jmuliaman97/README-generator.git

Usage

Open terminal and the application will be invoked with the following command: node index.js

License

MIT License

Contributing

Pull requests are welcome

Tests

Automated test for this project is unavailable.
